

MONOCROSS

The smartest and most effective solution for quick and reliable chassis checking.

Unique magnetic mounting enables a single person to easily perform measurement.

Offers:

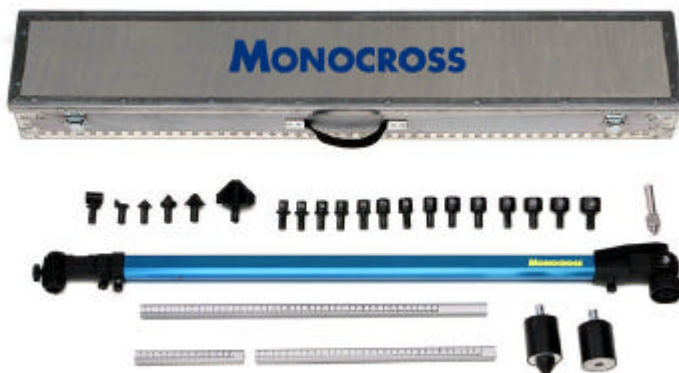

- 1 Symmetrical measurements
- 1 Length measurements
- 1 Height measurements
- 1 Quick set up
- 1 Easy to use and handle

The spirit level is used to check frame height and twist.

MONOCROSS

A product in due time!

Already at the introduction of MONOCROSS at the AUTOMECHANIKA show in Frankfurt autumn 1998, we understood that the product was going to be popular.

However, we had no idea that we, more that 5 years later, had produced and sold nearly 10,000 units! And the sales increases year by year.

We think this is a good proof that MONOCROSS is a product in due time.
